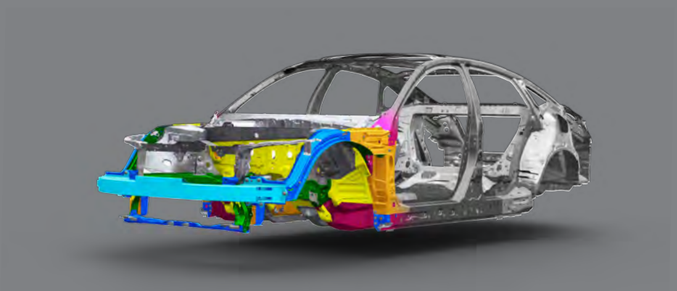
Confidence on the road.

Even the most attentive of drivers can miss things. That's why Honda offers an array of safety and driver-assistive technologies designed to assist and help protect you and your passengers.

- Advanced Compatibility Engineering™ (ACE™) body structure
- Advanced driver and front passenger airbags
- Multi-angle rearview camera[15]

Civic Sport Touring Hatchback shown in Sonic Gray Pearl.



The Honda Sensing® Suite.

A - Collision Mitigation Braking System™ (CMBS™)[16]
CMBS can help bring your vehicle to a stop by automatically applying brake pressure when the system determines that a frontal collision is unavoidable.

B - Lane Keeping Assist System (LKAS)[17]
With your hands on the steering wheel, long highway drives are easier with LKAS, which subtly adjusts steering to help keep your vehicle centered in a detected lane.

C - Road Departure Mitigation System (RDM)[18]
RDM can determine if you cross over detected lanes without signaling, can provide steering assistance to help you return to your lane, or provide braking to help keep you from leaving the roadway entirely.

Adaptive Cruise Control (ACC)[19]
ACC helps you maintain a set following interval behind detected vehicles for highway driving.
